

Dear Ms. Stommes:

**RE: Docket No. TMD-94-00-2**

As I eat, buy, or grow organic foods, the integrity of the word "organic" is critical to my health as well as the health and well being of millions of others in this nation.

The word "organic" has been a standard of quality for decades and I demand that this standard not be tampered with.

Please adhere to the National Organic Standards Board National List recommendations by keeping unwanted materials out of organic production, reducing the economic impact of fees on small farmers and small-scale certifiers, and allowing for other eco-labels and more stringent standards.

Sincerely
